

MULTI ASSET PLATFORM MODERATE FUND

Fund Objective

The Multi Asset Platform Moderate Fund (the "Fund") seeks to provide investors with medium to long term investment growth by investing across nine asset classes. Traditional asset classes are accessed through low cost index tracking techniques while alternative asset classes such as Absolute Return and Private Equity are accessed using active management techniques and skilled managers. The asset allocation of the Fund takes inspiration from the successful Harvard and Yale Endowment funds and is strategic and long term combined with disciplined rebalancing techniques. The Fund is 100% leveraged which provides investors with a market exposure of approximately 200% of their invested amount. Leverage will increase the risk and volatility of the Fund. It should be expected that 100% leverage will approximately double any performance gains as well as doubling any performance losses. The Fund offers monthly subscriptions and redemptions.

Strategic Asset Allocation¹

Asset Class Returns: August 2017²

Asset Class Returns: 12 Months²

Manager Commentary²

The Frontier MAP Moderate Fund (the "Fund") delivered a neutral performance with Class B USD returning +0.08% net of all fees and expenses in September bringing the performance for the year to +12.24%.

Despite the mixed results of the German Election in which Angela Merkel has won a fourth term as a Chancellor, European markets posted strong gains with the German Dax and the Eurostoxx 50 indices being up +6.41% and +5.19% respectively in September. On the back of the results, Merkel's CDU/CSU party will have to strike a deal with the Greens and the Liberal FDP parties to form what is called a Jamaica Coalition government. Within the European Union, the situation in Spain with the Catalan referendum adds a layer of uncertainty and has started to send the single currency lower over the month as the Euro traded down from a 2 year high of 1.2036 against the U.S Dollar to 1.1814 at the end of the month.

On the macroeconomic side, data confirmed that the Euro area recovery was still on track as suggested by the preliminary Eurozone Composite PMI Index which came in at 56.7 in September and up from 55.7 in August. The reading also shows that the growth in the private business was supported by a strong manufacturing sector which saw its biggest rise in employment in more than two decades. Strong economic data coupled with positive inflationary pressures and the fact that the ECB raised its Eurozone economic growth forecast for this year to 2.2%, are fuelling expectations around the ECB monthly bonds buying program. In the U.S, despite a core inflation being at its lowest point in nearly two years, the latest comments from the Fed were slightly more hawkish and suggested that we should expect one more rate hike before year end.

Within the portfolio, the U.S Small & Mid Cap equities were the best performing asset classes delivering a return of +6.24% and +3.76% respectively for the month while our Private Equity strategy contributed positively once again to the performance and posted a return of +3.5% over the month. The largest detractor to the performance was the Managed Futures strategy which traded down -3.2% in September but we are comfortable with this strategy as it brings large diversification benefits to the fund.

The Four Pillars of Investing: The Key to Long Term Investment Success
1: Traditional & Alternative Asset Classes Generate Long Run Real Returns

Empirical data shows that traditional and alternative asset classes have generated a return above inflation (real return) and cash (excess return) over the medium to long term (5 to 10 years).

Nominal Asset Class Returns: Jan-92 to Dec-16

Source: Frontier. Please see note 4 below.

2: Strategic Asset Allocation Drives the Majority of Portfolio Return and Risk

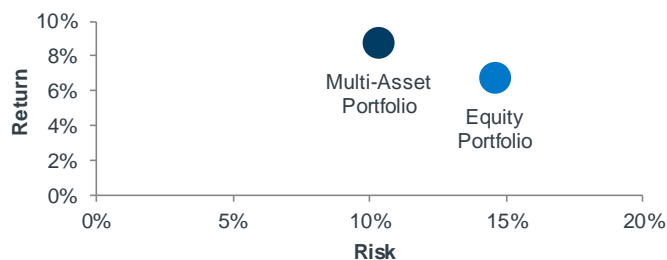

It is the long term, or strategic, asset allocation of a portfolio that will determine the vast majority of a portfolio's return and risk.

Return drivers of a diversified portfolio

Source: Brinson, Hood, Beebower, Journal of Finance, 1991

3: Modern Portfolio Theory: Diversification Increases Risk-adjusted Returns

Diversification across multiple asset classes can increase a portfolio's risk-adjusted return creating a more "efficient" portfolio. Alternative asset classes, with their ability to generate attractive returns throughout the economic cycle, significantly increase portfolio efficiency.

Return & risk with diversification: Jan-92 to Dec-16

Source: Frontier. Please see note 5 below.

4: Index Investing Outperforms the Majority of Actively Managed Investments

Index investing provides a consistent, cost-efficient method of capturing the returns of an asset class which over the long-term can provide outperformance relative to active management as supported by the empirical data.

Percentage of active funds that underperform the index

IMPORTANT NOTES

- The strategic asset allocation was implemented on 3 April 2017. Actual asset weights will differ from the policy weights as a result of the relative performance of asset classes between these reviews. Global Equities comprises allocations to global equities, U.S. Mid Cap equities and U.S. Small Cap equities.
- Asset class returns shown in the graph and in the commentary are not the actual returns earned by the Fund. They are the returns of a broad market index as defined below and are a proxy estimate for the performance achieved by the Fund and are shown net of 1.25% annual estimated fees and costs.
- Fund performance is calculated from NAVs over the calendar month. The complete track record since inception is available upon request.
- Each asset class is defined by a broad market index defined below. Asset class returns are gross of fees and in USD. Data has been sourced from Bloomberg.
- Multi-Asset Portfolio consists of an equally weighted 9 asset class portfolio composed of the broad market indices defined below, rebalanced annually on 31 December, gross of fees and in USD. Equity portfolio represents MSCI World Index, gross of fees and in USD.

This document is issued by RAB Capital Limited ("RAB") in respect of the Multi Asset Platform Fund SPC ("the MAP Fund") which is domiciled in the Cayman Islands. The Multi Asset Moderate Segregated Portfolio ("the Fund") is a Segregated Portfolio of the MAP Fund. The document does not constitute an offer by RAB to enter into any contractual agreement nor is it a solicitation to buy or sell any investment. Potential investors are directed to read the Fund prospectus and should consult with their professional advisors. In the event that there are any differences between this material and the Prospectus, the terms of the Prospectus will prevail. The Fund was invested on 2 September 2005. Performance data from September 2005 are based on actual fund NAVs. In respect of share classes established after September 2005, performance data is based upon pre-existing share class NAVs adjusted for fee differentials and hedged into USD. Policy asset weights in the Fund are reviewed on an annual basis. Actual asset weights will differ from the policy weights as a result of the relative performance of asset classes between annual reviews. Asset Class returns are based on estimated performance of the underlying MAP Fund asset class holdings net of fees and costs and are in USD. The Funds track the following indices, selected by RAB to be representative of each asset class: MSCI World Index (Global Equities), LPX50 TR Index (Private Equity), MSCI Emerging Markets Index (Emerging Equities), Barclays Global Aggregate Bond Index (Global Fixed Income), JP Morgan Emerging Markets Bond Plus Index (Emerging Bonds), Dow Jones Global Select Real Estate Securities Index (Real Estate), S&P GSCI Light Energy Index (Commodities), 50% S&P GSCI Full Energy Total Return Index and 50% S&P North American Natural Resources Total Return Index (Natural Resources), HFRI Fund Weighted Composite Index (Hedge Funds). (HFRI Index is shown in asset class return chart for one month performance, and the SG Trend Index (formerly NewEdge Trend Index) (Managed Futures). RAB is authorised and regulated in the UK by the Financial Conduct Authority ("FCA") and Frontier Investment Management LLP ("Frontier") has become an FCA Appointed Representative of RAB in order to conduct regulated activities related to the sales and marketing of investment products and services. The Fund is classified in the UK as an unregulated collective investment scheme (UCIS) and the promotion of such a scheme either within the UK or from the UK is restricted by the Financial Services and Markets Act 2000 ("FSMA"). Consequently, this document is only made available to professional clients and eligible counterparties as defined by the FCA Conduct of Business Sourcebook 4.12.1R and the statutory requirements under FSMA.
