WELCOME TO THE INVESTMENT PLATFORM

Investment Platforms have been at the forefront of profound change within the investment industry where investors have demanded more flexible, transparent and competitive solutions to their investment requirements.

The Investment Platform (TiP) has been very much part of this change and we can only be successful if we can continually demonstrate our value to investors, providing an excellent product that is cost effective, easy to use at a competitive price. TiP is committed to continuing to be at the forefront of this evolution.

The Investment Platform was established in response to continued demand for an alternative platform, one that could offer easy access to a large universe of funds, structured products, ETFs, and direct equities. The Investment Platform is able to offer access to all of the above and this guide is intended to explain more about the Platform and how we believe it can help you to expand your investment horizons.

What we offer

- We have delivered full transparency to clients, where the charges are clearly and concisely explained and where The Investment Platform receives absolutely NO rebates from investment managers
- We've worked with our partners at Mauritius Commercial Bank (MCB) to be able to access a wide range of institutional share classes.
- We provide a personalised charging summary for every client.

- The Athena Discretionary Fund Management Service is available if required. It allows a UK Authorised and domiciled fund manager to manage your clients portfolios directly on the platform

- We have an experienced team that have spent years working in the support and marketing operations of investment companies and you can be confident that we can support you.

Sustainable Support

The Investment Platform was launched after significant analysis of what clients wanted and after significant planning with our key strategic partners. Sustainability and support are essential when looking for a platform upon which to build an investor's future. We are committed to providing this support and developing the platform as investor demands increase.

We hope that this guide will give you a more detailed idea of what The Investment Platform can provide.

WHAT IS THE INVESTMENT PLATFORM?

We believe our Investment platform offers the most comprehensive, flexible and cohesive investment platform in the international advisory market place. We have the ability to accept lower contributions, meaning that many investors can now access a fund platform at a competitive price.

Here's an overview of some of the services and support that we can offer you:
