RWGIF Portfolio Strategy

The Fund invests in a diversified pool of high-yielding corporate bonds and preference shares issued in the main by listed large-cap institutions, and asset-backed securities. All the Fund's investments are listed on at least one major exchange. The Fund aims to deliver a gross income (ex capital appreciation), of 5.5% annually, either paid in semi-annual instalments or reinvested in the Fund at investors' discretion. The Fund's assets can be denominated in a number of different currencies but are predominantly in GBP, USD and EUR. Currency exposure across non-GBP assets is hedged back into GBP and non-GBP share classes are hedged back into their base currencies on a rolling monthly basis. The Fund may take on a limited amount of leverage via derivatives and may invest in large cap high-yielding equities, but currently exercises neither of these options.

Manager's Commentary

Last month, we suggested a trace of 'complacency' in the financial markets about the spread and economic impact of Covid-19 and it was only in the latter half of February, the broader risks were properly appreciated. During the month of February the Fund was down 2.1%, leaving it roughly flat for the year to date. Oil related assets were the worst affected however, nearly all of the Fund's holdings experienced a markdown in value. We have now seen credit markets stabilise since the month end and Central Banks busily cutting interest rates, cuts which seem largely symbolic but will help underpin the value of the Fund's higher yielding assets. We will obviously, where appropriate, aim to take advantage of any lower price levels in the coming weeks.
